

infraeasy
powerfully simple

Is your ERP exclusive for
your Infrastructure/
Construction Business

A solution that is powerful, comprehensive and comes with an easy implementation process.

A PROJECT BASED ERP SOLUTION

Project based solutions is an enterprise wide computer software business solution that manages and coordinates all resources, information and functions of an organisation from a shared data source; where data can be attributed to and managed through individual projects.

A PBS system's modular design allows a business to add or reconfigure modules while preserving data integrity in one shared database that may be centralized or distributed.

DESIGNED BY EXPERTS FROM THE INDUSTRY

When you move into Infra easy, its like appointing an expert manager who knows everything about your business. It has tools and features that are designed to tackle all your day-to day problems and also makes future projections. It runs on your existing hardware. Doesn't need an IT department to manage.

You will see what a difference Infraeasy can make to your business.

TOTALLY INTEGRATED SYSTEM FOR THE INFRASTRUCTURE INDUSTRY

Infrastructure and Construction are complex sectors, the complex internal linkages of Infrastructure/Construction enterprises require a dynamic management, tracking and decision support system that integrates with different work flows and enterprise cultures. Infraeasy is an ERP solution where business rules of the Infrastructure and Construction Industry has been accommodated which makes it different from any other generic ERP.

ANYTIME ANYWHERE ACCESS

Infraeasy is a web-based solution which makes it easy to access any information of your business, anytime, anywhere and by anyone who is authorized. Thus enables you in critical decision making process and increasing the efficiency of operations thereby improving the profitability of the company.

MANAGE MULTIPLE PROJECTS ON YOUR OWN

Not you, a lot of companies in Infrastructure and Construction Industry outsource their project management activities to consultants and project management companies. Outsourcing project management activities increase the cost of project as well as it also increases the time of project completion. Infraeasy enables you to manage project management activities on your own with the help of Project management modules

that accommodate features like project planning, cost estimation and budgeting, work breakdown structure, bill of work, project progress report and work capture.

COMES WITH MULTIPLE FEATURES

A Comprehensive Integrated Solution for the Infra Industry | Anytime/anywhere access | An IBM ISV Solution | Bottom up approach for reliable data capture | Integrates role based security features | Works with existing IT department | Interoperable, platform independent architecture | Remote data management/audit | Readily available tools for BI/DSS
